## Cinemia **Screen Lounges:** Progress report on design

Progress and outline of research areas and design strategies to 19.02.2002

---

### 01.] **Federation Square interior fit-out/materials .**

Meeting with Libby at Lab Architects on Monday 18 at 4.30pm to look at the suite of proposed materials for the interior fit-out of the ACMI facility at Federation Square. Materials and shapes for reception desks, couches were also discussed.

### 02.] **Interior materials and upholstery.**

Textile Mania have presented their sample range of commercial fabrics. Argile Interiors are presenting their range on Thursday.

### 03.] **Interior concept design.**

Renders to be presented on initial seating geometries and screen arrangements following on from our discussion at last weeks meeting

### 04.] **Switchable glass and LCD glass.**

We are investigating the possible use of switchable or electrochromic glass for use in the screen lounges. We are also looking at LCD glass. We have contacted:

Sustainable Technologies Australia re their Smart Windows

Priva-lite re their Liquid Crystal products

Skydome Industries advanced glazing systems

NSG UMU Products re their switchable glass products

### 05.] **Interior lighting.**

We are continuing to investigate the use of electroluminescent panelling and LED lighting for use in the screen lounges. We have contacted:

Showers Lighting re their Dio lighting range

Eleven Lighting re their cold cathode lighting

### 06.] **Acoustic damping.**

We are investigating the product range of the Australian company Clearsonics with regard to active sound damping.

### 07.] **Plasma Screen dimensions.**

We have obtained preliminary dimensions for some of the proposed Plasma screens.
